

Small Bodies & Dust Node

HARDWARE & SOFTWARE

Francesco Carraro
carraro@asdc.asi.it

Hardware

The server machine is located in ASI (Rome)

Technical info:

- Cluster with a couple of “HP Proliant DL 380 G4”
- Each machine has:
 - 2 processors
 - 50 GB primary partition
 - 250 GB logical partition
 - 9 free slots to add other HDs

Operating system: Linux

Regular backup of data made by the system administrator on tape and stored in different place

The 2 servers constitute a RAID system.

Software

ASI web site hosts a link to web pages dedicated to Europlanet at this link:

<http://193.204.102.79/idis/>

This web site is a virtual meeting place, which facilitates both the real **Meetings** (sharing on preparatory briefings, development and publication of Reports and follow-ups) and the remote meetings of Europlanet partners, that can happen when necessary on the **Data exchange platform**.

This platform offers the possibility to create a repository for documents and to create a threading mail system

This system is now being updated.
